ABOUT ME

Computer Science Engineering student focused on **software system design and architecture**.
I enjoy transforming complex real-world requirements into structured, scalable systems by defining domains, business rules, workflows, relationships, and architectural boundaries before implementation.

My work explores systems such as **multi-tenant platforms, digital content delivery, and education platforms** with an emphasis on creating clear, extensible, and maintainable software architectures

+880 1741-589749

farhad.codes@gmail.com

Wari, Dhaka, Bangladesh

EDUCATION

Final Semester

Studying

BSc in Computer Science & Engineering
Jagannath University, Dhaka

EXPERIENCES

Jr Flutter Developer
Softvence IT Ltd, (Betopia Group)

Sep,2025 - Dec,2025

- Developed intuitive UI interfaces ensuring seamless user journeys.
- Collaborated on REST API integrations, state management, and debugging feature issues.
- Participated in UAT to verify UI consistency and functional alignment

MENTORSHIP

Computer Science Educator
Instructed CSE students in core CS Theory, programming principles.
Sharpening ability to explain complex technical concepts to non-technical stakeholders.

PROJECTS

Multi-Tenant Mess Management System

- Mess as a first-class tenant and operational context.
- Design a structured architecture to allow users to create, join, leave, and manage multiple mess contexts while preserving historical records

Competency Based Learning system

- Design a structured learning system centered on competency evaluation rather than traditional examinations
- Defined learning stages, levels, custom curriculum, learning materials, and evaluation workflows.
- Modeled the system around progressive skill development in areas such as communication, English, and mathematical reasoning.

Secure Digital Content Delivery Platform

- Design digital publishing and content-delivery system for protected eBooks and digital publications..

TECH SKILL

Next.js

TailWind CSS

Node

REST APIS
